SUMMARY

Final-year B.Tech Computer Science student with hands-on experience building full-stack and AI-powered web apps using Python, Flask and LLM APIs. Active open-source contributor with 11 merged pull requests across 6 repositories. Seeking a software engineering role to ship reliable products and keep learning.

EDUCATION

B.Tech, Computer Science & Engineering — Jadavpur Institute of Technology, Kolkata 2023 – 2027 (expected)
CGPA: 8.7 / 10 · Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

Class XII (CBSE) — Delhi Public School, Kolkata 2023 · 94.2%

Class X (CBSE) — Delhi Public School, Kolkata 2021 · 96.4%

PROJECTS

IssueSherpa — AI guide for open-source contributions Oct 2026
Flask, LangChain, Groq (gpt-oss-20b), GitHub REST API, JavaScript, Docker · github.com/aaravsharma-dev/issuesherpa

- Built a web app that searches open “good first issue” tickets on GitHub and ranks them for beginner fit using an LLM with structured (Pydantic) output.
- Designed a LangChain pipeline that runs issue analysis and file selection in parallel, then streams a step-by-step fix plan to the browser over Server-Sent Events.
- Added per-IP rate limiting, TTL caching and prompt-injection guards, cutting repeat-request latency by ~60%; deployed in a Docker container.

ExpenseLens — Personal finance tracker Mar 2026
Python, FastAPI, PostgreSQL, React · github.com/aaravsharma-dev/expenselens

- Developed a REST API and dashboard that categorises bank-statement CSVs and visualises monthly spending; used by 40+ classmates during beta.
- Implemented JWT authentication and indexed queries that brought dashboard load time from 2.4s to 0.7s on 50k transactions.

SKILLS

Languages: Python, JavaScript, Java, C++, SQL
Web & Backend: Flask, FastAPI, React, REST APIs, PostgreSQL, Server-Sent Events
AI / ML: LangChain, LLM APIs (Groq), prompt engineering, scikit-learn
Tools: Git, GitHub, Docker, Linux, Postman
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networks

EXPERIENCE

Software Development Intern — Nimbus Labs Pvt. Ltd., Kolkata (Remote) May 2026 – Jul 2026

- Built an internal REST service in Flask for ticket routing that reduced manual triage time by 35% for a 12-person support team.
- Wrote 60+ unit tests with pytest, raising coverage from 48% to 82%, and fixed 15 production bugs.
- Worked in two-week sprints using Git, code reviews and Jira.

Open-Source Contributor — Hacktoberfest 2026 Oct 2026

- Merged 11 pull requests (bug fixes, docs, tests) across 6 public repositories.

ACHIEVEMENTS & ACTIVITIES

- Finalist, MLH x DigitalOcean Hacktoberfest 2026 challenge.
- Solved 450+ problems on LeetCode (max rating 1720); CodeChef 3-star.
- Technical Lead, college coding club — organised 4 workshops for 200+ students.
